

3. Attendance and Exceptional Events Reporting Requirements Spec

taled

1. 3. Attendance and Exceptional Events Reporting

ID: UC03

Primary Actors	 Instructor
Level	N/A
Complexity	N/A
Use Case Status	N/A
Implementation Status	N/A
Preconditions	1. The instructor is logged into the system. 2. The activity exists in the system. 3. Students are assigned to the selected activity.
Post-conditions	1. Attendance statuses for all selected students are saved in the system. 2. Exceptional event comments are documented and linked to the activity.
Author	N/A
Assumptions	N/A

1.1. Scenarios

1.1.1. Scenario

1. The instructor selects a specific activity.
2. **if** Activity not found or unauthorized:
 - 2.1. The System displays an error message and restricts access to the attendance list.**end if**
3. The system displays the list of students assigned to the selected activity.
4. The instructor selects an attendance status for each student from a predefined list:
5. "Present"/"Absent – Updated in Advance"/"Absent – Not Updated in Advance.
6. The instructor adds free-text comments if needed.
7. The instructor submits the attendance report.
8. The system verifies that the report is submitted during the activity or up to one day after it.
9. **if** Reporting window has expired (more than 24 hours post-activity):
 - 9.1. The System locks the editing fields.
 - 9.2. The System notifies the Instructor to contact the Coordinator for manual updates.**end if**
10. The system saves the attendance statuses and comments.
11. **if** Missing data:
 - 11.1. The System highlights students who have not been assigned a status and prevents submission until completion.**end if**
12. The system documents the attendance report and any exceptional events related to the activity.
- 13.

2. Customer Managment Requirements Spec2

taled

1. 2. Customer Managment

ID: UC02

Primary Actors	♀ Managment Employee
Level	N/A
Complexity	N/A
Use Case Status	N/A
Implementation Status	N/A
Preconditions	1. The system is online and connected to the "Daniel Center" database. 2. The Client has access to the digital registration link. 3. The Manager/Bookkeeper is logged in with appropriate permissions.
Post-conditions	1. A new customer profile is stored with all legal/medical documents attached. 2. The client's financial balance is automatically synchronized based on the approved discount. 3. All lifecycle actions are recorded and visible in "Daniel Center" database.
Author	N/A
Assumptions	N/A

1.1. Scenarios

1.1.1. Scenario

1. The Client opens the digital registration form.
2. The Client enters their Personal Details (Full Name, ID, Phone, Email, City, Date of Birth).
3. The Client uploads a signed Health Declaration (PDF/JPEG) and adds optional comments.
4. Optional: The Client selects a discount category (e.g., Soldier, Student) and uploads an eligibility document.
5. **if** The Client selects a discount category:
 - 5.1. The System sets the request status to "In Progress" and alerts the Accounting Manager.
 - 5.2. The Accounting Manager reviews the eligibility document in the management dashboard.
 - 5.3. **if** the uploaded document is unreadable or invalid:
 - 5.3.1. The Accounting Manager sets the status to "Missing Documents."
 - 5.3.2. The System notifies the client to re-upload the file.**end if**
 - 5.4. The Accounting Manager approves the discount and enters the percentage (0-100%).
 - 5.5. **if** the entered discount percentage is invalid (not 0-100):
 - 5.5.1. The System prevents saving and requests a valid number.**end if**
 - 5.6. The System recalculates the balance and updates the status to "Completed."**end if**
6. The System verifies that all mandatory fields are filled and that the National ID is unique.

7. **if** any mandatory fields are missing or the ID already exists:

7.1. The System blocks the submission and displays a specific error message.

end if

8. The Client submits the form.

9. The System creates an Active profile.

10. The Accounting Manager searches for the profile, edit necessary fields (e.g., contact info), and click "Save."

11. **if** the Manager attempts to close the edit screen without clicking "Save":

11.1. The System displays a warning: "Unsaved changes will be lost."

end if

12. The Accounting Manager changes the status of an inactive client to "Archive."

13. **if** the client has an outstanding debt:

13.1. The System alerts the Accounting Manager and requires an override confirmation to move the client to the Archive.

end if

8. Automatic Comparison Between Employee Attendance Reports and Activity Schedule Requirements Spec

taled

1. 8. Automatic Comparison Between Employee Attendance Reports and Activity Schedule

ID: UC08

Primary Actors	 <<System Time>>
Level	N/A
Complexity	N/A
Use Case Status	N/A
Implementation Status	N/A
Preconditions	Pre-Conditions: 1. Employees have already submitted their attendance hours (check-in/check-out). 2. The system has the actual activity data recorded in the system. 3. The Management Employee is logged into the system.
Post-conditions	Post-Conditions: 1. The shift report is updated to "Approved". 2. Any manual changes made to the hours are saved. 3. The written note explaining the exception is saved in the database.
Author	N/A
Assumptions	N/A

1.1. Scenarios

1.1.1. Scenario

1. The System reaches the scheduled time and starts the automatic comparison.
2. The system checks each employee's reported hours against the actual activity hours logged.
3. **if** An employee has actual activity logs but completely forgot to clock in (Reported Hours = 0):
 - 3.1. The system flags the record as "Missing Attendance Report" instead of a regular variance.
 - 3.2. The system alerts the Management Employee to manually create a new attendance log.**end if**
4. **if** The system finds a difference between reported hours and actual hours that is greater than two hours:
 - 4.1. The system creates a visual alert (highlights the row in red).
 - 4.2. The system stops the automatic approval for this specific record.
 - 4.3. The system waits for the Management Employee to choose: either fix the hours or approve the exception.
 - 4.3.1. **if** The Management Employee chooses to fix the hours manually:
 - 4.3.1.1. The system opens the hours for editing.
 - 4.3.1.2. The Management Employee types the corrected hours and clicks the "Save" button.
 - 4.3.1.3. The system recalculates the difference and goes back to step 3 if the issue is resolved.**end if**

4.3.2. **if** The Management Employee chooses to keep the hours as they are and approve the exception:

4.3.2.1. The Management Employee clicks the "Approve Exception" or "Sync Now" button.

4.3.2.2. **if** The Management Employee realizes they approved an exception by mistake:

4.3.2.2.1. The Management Employee clicks "Undo Approval" on a synced record.

4.3.2.2.2. The system restores the red alert status and allows editing or re-evaluating the variance.

end if

4.3.2.3. The system opens a mandatory text box and asks for an explanation.

4.3.2.4. The Management Employee types a text reason (e.g., "Instructor stayed late to clean the boats") and submits.

4.3.2.5. **if** The Management Employee leaves the explanation text box empty or enters invalid short text (e.g., just a space or a dot "."):

4.3.2.5.1. The system displays an error message: "Justification must be at least 10 characters long".

4.3.2.5.2. The system blocks the approval until a proper explanation is typed.

end if

4.3.2.6. The system saves the note, removes the red alert.

end if

end if

5. The system finds no differences greater than two hours.

6. The system automatically marks the hours as "Approved" and synced.

7. The system displays a clean dashboard report with zero alerts.

UC02.Activity Resource Assignment Requirements Spec

yuval

1. UC02.Activity Resource Assignment

ID: UC02

Primary Actors	 Coordinator
Level	N/A
Complexity	N/A
Use Case Status	N/A
Implementation Status	N/A
Preconditions	The coordinator is logged into the system. Activities, instructors, students, and boats exist in the system. Relevant resources are marked as active and available.
Post-conditions	The activity is updated with assigned boats, instructors, and students. The activity schedule is updated in the system.
Author	N/A
Assumptions	N/A

1.1. Scenarios

1.1.1. MSS

1. The coordinator enters the “Activity Resource Assignment” screen.
2. The system displays the activity schedule.
3. The coordinator selects an existing activity or creates a new activity.
4. The coordinator enters the activity details.
5. The system activates UC03 – Assign Boats.
6. The system activates UC04 – Assign Instructors and Students.
7. The system validates resource availability and scheduling conflicts.
8. The system saves the activity assignment.
9. The system updates the activity schedule.
10. The system displays a confirmation message

1.1.2. 5a. No Available Boats

1. The system displays a warning message indicating that no available boats exist.
2. The coordinator may activate UC0301 – Outsource Boats Assignment.

1.1.3. 6a. No Available Instructor

1. The system displays a warning message indicating that no instructor is available.
2. The coordinator selects another instructor or changes the activity time.

1.1.4. 7a. Scheduling Conflict Detected

1. The system displays the conflict details.
2. The coordinator updates the selected resources.

UC03. Assign Boats Requirements Spec2

1. UC03. Assign Boats

ID: UC03

Goal:

Allow the coordinator to assign available and operational boats to students participating in an activity.

Level	N/A
Complexity	N/A
Use Case Status	N/A
Implementation Status	N/A
Preconditions	An activity exists in the system. Students are assigned to the activity. Boats exist in the system. The coordinator is logged into the system.
Post-conditions	Boats are assigned to the activity participants. The assigned boats are marked as unavailable during the activity time. The updated assignment is saved in the system.
Author	N/A
Assumptions	N/A

1.1. Scenarios

1.1.1. MSS

1. The coordinator enters the "Assign Boats" screen.
2. The system displays the selected activity and the list of participating students.
3. The system displays all available and operational boats.
4. The coordinator selects a boat for each student or group.
5. The system checks the availability and status of the selected boats.
6. The coordinator confirms the assignment.
7. The system saves the boat assignments.
8. The system updates the activity schedule and boat availability status.
9. The system displays a confirmation message.

1.1.2. 3a. No Available Boats

1. The system displays a warning message indicating that no boats are available.
2. The coordinator may activate UC0301 – Outsource Boats Assignment.

1.1.3. 5a. Selected Boat Is Out of Service

1. The system displays a message indicating that the selected boat is unavailable.
2. The coordinator selects another boat.

1.1.4. 5b. Scheduling Conflict Detected

1. The system identifies that the selected boat is already assigned to another activity.
2. The system displays the conflict details.
3. The coordinator selects another available boat.

1.1.5. 7a. System Saving Failure

1. The system displays an error message.
2. The assignment is not saved until the issue is resolved.

UC04. Assign Instructors and Students Requirements Spec

yuval

1. UC04. Assign Instructors and Students

ID: UC04

Goal:

Allow the coordinator to assign instructors and students to a specific activity according to availability, certification, and group characteristics.

Primary Actors	 Coordinator
Level	N/A
Complexity	N/A
Use Case Status	N/A
Implementation Status	N/A
Preconditions	An activity exists in the system. Instructors and students exist in the system. The coordinator is logged into the system. Relevant instructors are marked as active and certified.
Post-conditions	The selected instructor is assigned to the activity. The selected students are assigned to the activity. The updated assignment is saved in the system. The activity schedule is updated.
Author	N/A
Assumptions	N/A

1.1. Scenarios

1.1.1. MSS

1. The coordinator enters the "Assign Instructors and Students" screen.
2. The system displays the selected activity details.
3. The system displays a list of available and certified instructors.
4. The coordinator selects an instructor for the activity.
5. The system displays a list of students relevant to the activity based on age group and activity type.
6. The coordinator selects students for the activity.
7. The system validates instructor and student availability.
8. The coordinator confirms the assignment.
9. The system saves the instructor and student assignments.
10. The system updates the activity schedule.
11. The system displays a confirmation message.

1.1.2. 3a. No Available Instructor

1. The system displays a warning message indicating that no certified instructor is available.
2. The coordinator may select another activity time.

1.1.3. 5a. No Available Students

1. The system displays a message indicating that no students match the activity requirements.
2. The coordinator may modify the activity criteria.

1.1.4. 7a. Scheduling Conflict Detected

1. The system identifies a scheduling conflict with the selected instructor or students.
2. The system displays the conflict details.
3. The coordinator selects different participants.

1.1.5. 9a. System Saving Failure

1. The system displays an error message.
2. The assignment is not saved until the issue is resolved.

UC05.Replace Boat/ Instructor Requirements Spec

yuval

1. UC05.Replace Boat/Instructor

ID: UC05

Goal:

Allow the coordinator to replace assigned resources during an activity in case of an unexpected issue or equipment failure.

Primary Actors	 Coordinator
Level	N/A
Complexity	N/A
Use Case Status	N/A
Implementation Status	N/A
Preconditions	An activity already exists in the system. Boats and instructors are assigned to the activity. The coordinator is logged into the system. A problem or unexpected issue has been identified during the activity.
Post-conditions	The selected boat or instructor is replaced in the activity. The updated assignment is saved in the system. The activity schedule reflects the updated resources.
Author	N/A
Assumptions	N/A

1.1. Scenarios

1.1.1. MSS

1. The coordinator enters the "Replace Boat/Instructor" screen.
2. The system displays the current activity details, including assigned instructors, students, and boats.
3. The coordinator selects the resource that requires replacement.
4. The system displays available replacement boats and instructors.
5. The coordinator selects a replacement resource.
6. The system validates the availability of the selected replacement.
7. The system updates the activity assignment.
8. The system updates the activity schedule.
9. The system displays a confirmation message indicating that the replacement was completed successfully.

1.1.2. 4a. No Available Replacement Boat

1. The system displays a warning message indicating that no replacement boat is available.
2. The coordinator may activate UC0301 – Outsource Boats Assignment.

1.1.3. 4b. No Available Replacement Instructor

1. The system displays a warning message indicating that no replacement instructor is available.
2. The coordinator may postpone or cancel the activity.

1.1.4. 6a. Scheduling Conflict Detected

1. The system displays the scheduling conflict details.
2. The coordinator selects another replacement resource.

1.1.5. System Update Failure

1. The system displays an error message.
2. The replacement process is canceled until the issue is resolved.

UC07.Lesson Cancellation Update Requirements Spec

yuval

1. UC07.Lesson Cancellation Update

ID: UC07

Goal:

Allow the coordinator or instructors to notify participants about a lesson cancellation due to weather conditions or other unexpected events.

Primary Actors	👤 Coordinator, 👤 Instructors
Level	N/A
Complexity	N/A
Use Case Status	N/A
Implementation Status	N/A
Preconditions	The coordinator is logged into the system. An activity exists in the schedule. Participants are assigned to the activity. Contact information for participants exists in the system
Post-conditions	The activity status is updated to "Canceled". Participants receive a cancellation notification. The activity schedule is updated in the system.
Author	N/A
Assumptions	N/A

1.1. Scenarios

1.1.1. MSS

1. The coordinator enters the "Lesson Cancellation Update" screen.
2. The system displays the list of scheduled activities.
3. The coordinator selects the activity to cancel.
4. The coordinator enters the cancellation reason.
5. The coordinator confirms the cancellation.
6. The system updates the activity status to "Canceled".
7. The system sends a cancellation notification to all registered participants.
8. The system updates the activity schedule.
9. The system displays a confirmation message.

1.1.2. 3a. Activity Does Not Exist

1. The system displays an error message indicating that the selected activity does not exist.
2. The coordinator selects another activity.

1.1.3. 7a. Notification Delivery Failure

1. The system displays a warning message indicating that the notification could not be sent to some participants.
2. The system logs the failed notifications for follow-up.

1.1.4. 8a. Schedule Update Failure

1. The system displays an error message.
2. The cancellation process is not completed until the issue is resolved.
